

SUPER LAMB®

INSTANT MILK REPLACER

with DIRECT FED MICROBIALS

" the ideal replacement for ewe's milk "

Replaces ewe's milk and saves baby lambs.

Super Lamb Instant Milk Replacer is a high quality product specially formulated for baby lambs. Super Lamb is *the* replacement for ewe's milk.

This palatable, highly nutritious blend of vitamins, minerals, direct-fed microbials and nonfat milk solids *really* works! It is carefully formulated to provide all the essential nutrients in the proper proportions to maximize the survival and growth rates of baby lambs.

Gives baby lambs that might otherwise die the strength they need to grow into marketable lambs.

With the use of more prolific sheep breeds, the incidence of live triplet and quadruplet lamb births has greatly increased. Since the average ewe is still capable of raising only two (occasionally three) lambs, many newborn lambs are literally dying of starvation.

These lambs could become profitable, marketable lambs. Super Lamb helps you save these lambs, as well as lambs that are orphaned or are the offspring of ewes with inadequate milk.

Contains direct-fed microbials.

Super Lamb is formulated with Omni-bos® Direct-Fed Microbials, a source of live, viable, naturally occurring microorganisms.

Saves you money because it saves your lambs!

- Stays in suspension up to 24 hours.
- Low lactose level reduces bloat.
- Small fat globules (2-4 micron size) and coconut oil results in higher digestibility and utilization.
- Added selenium.
- Highest guaranteed level of vitamin E.
- Packaged in both 8 lb pails and 25 lb bags.
